Subject: Software Engineer Application — Chew Sin Ai

Dear Hiring Team / Engineering Manager,

I am writing to express my strong interest in joining your team as a Software Engineer. I specialize in cross-platform mobile development (Flutter), enterprise backend systems (Java, PHP, FastAPI), and automated workflow engineering, with a consistent track record of building production-grade solutions.

Key Core Strengths I Bring to Your Team:

- **Production Mobile Engineering (Flutter & SQLite):** Architected and deployed a ruggedized Android scanner application with offline-first local caching and hardware barcode triggers, powering live warehouse operations across inbound receiving, picking, and physical stock count audits.
- **Enterprise Backend & Automation (Java & PHP):** Maintained core Java enterprise WMS web platforms, optimized relational database transactions in MySQL, and built automated PHP background cron workers with strict file-lock concurrency guards to prevent data collisions.
- **AI Document Intelligence & Pipeline Automation:** Engineered automated document ingestion pipelines utilizing Google Gemini multimodal OCR and Playwright headless browser scripts to eliminate manual administrative paperwork.
- **Academic & Research Excellence:** Graduated with a Bachelor of Software Engineering (Honours), CGPA 3.70 / 4.00 (Dean's List). Awarded Bronze Medal and published research thesis at InIIC 2024 for a real-time hospital patient management system.

I welcome the opportunity to discuss how my technical skills and proactive work ethic can add immediate value to your organization. You can explore my interactive projects and source code on my portfolio and GitHub.

Sincerely,

Chew Sin Ai
