

MyCEIDS Central Hub – User Manual

MyCEIDS Central Hub. This manual explains how to log in (TNet Keycloak), import emails, manage shipment bundles, classify documents with AI, and upload to MyCEIDS. Each grey box is a placeholder for a screenshot: in Word, open this file, Save As .docx, then insert your images into the boxes.

1. Login (TNet Keycloak)

You must sign in with TNet Keycloak to use the portal. Access is controlled by your organisation's TNet Keycloak single sign-on (SSO).

- **How to log in:** Open the portal URL in your browser. You will see the login page.
- **Username:** Enter your TNET account username (as provided by your IT / Keycloak admin).
- **Password:** Enter your TNET account password.
- **Sign in:** Click **Sign in with TNET**. If credentials are correct, you are taken to the main dashboard.
- If login fails, check username/password or contact **IT Support** [REDACTED]

Login page – TNet Keycloak – TNet Keycloak

Details: The login page shows "MyCEIDS Central Hub" and "Sign in with your TNET account". After a successful login, your session is stored until you sign out or close the browser (depending on configuration).

TESTING ACCOUNT:

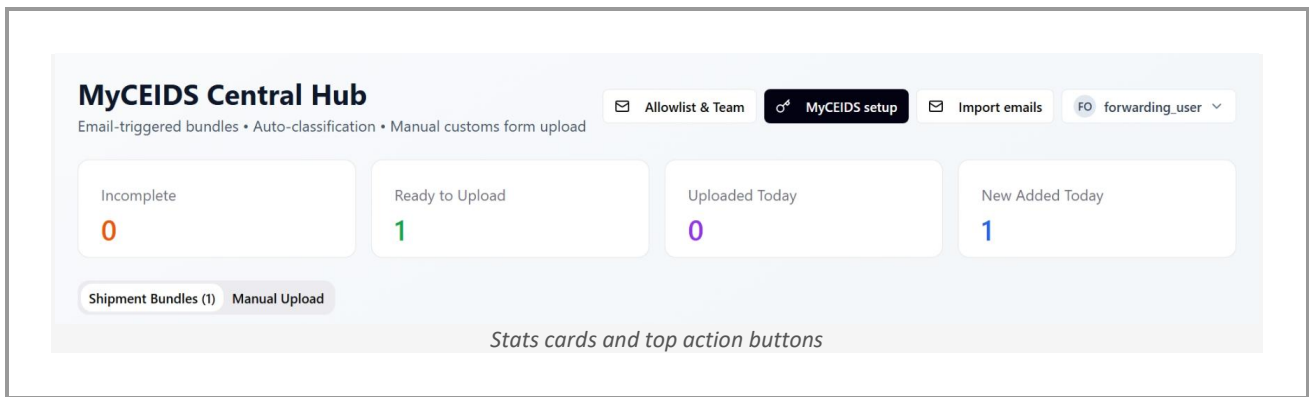

2. Dashboard (Getting Started)

After you log in, the main screen is the **dashboard**. Here you see:

- **Two tabs:** **Shipment Bundles** and **Manual Upload**.
- **Four statistic cards:** Incomplete, Ready to Upload, Uploaded Today, New Added Today.
- **Top buttons:** **Import** (fetch emails from mailbox), **Download Emails** (open Sender Allowlist), **MyCEIDS setup** (configure MyCEIDS credentials).
- If there are incomplete bundles, an orange alert card appears: "Shipments Require Attention".

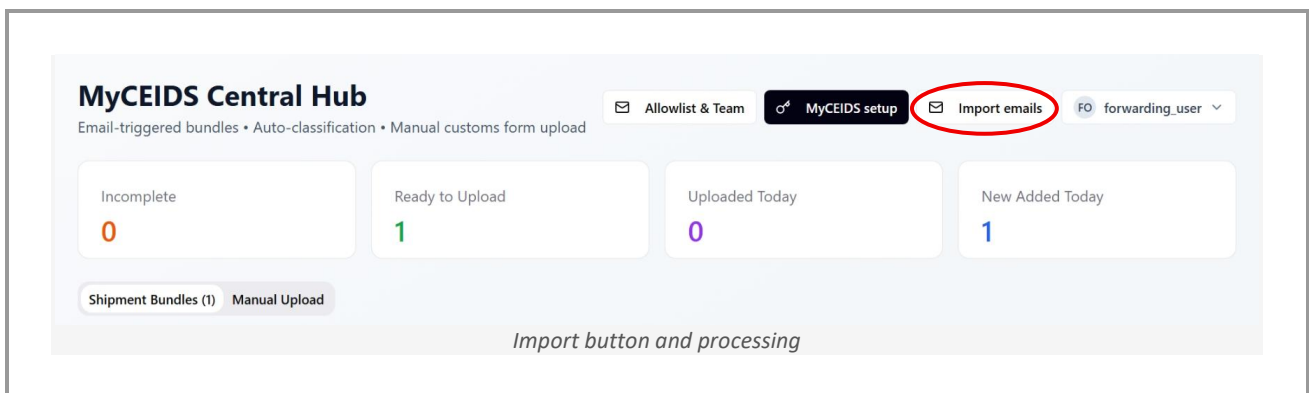

The screenshot shows the 'MyCEIDS Central Hub' dashboard. At the top, there's a header with the title 'MyCEIDS Central Hub' and a subtitle 'Email-triggered bundles • Auto-classification • Manual customs form upload'. To the right of the header are several buttons: 'Allowlist & Team', 'MyCEIDS setup' (highlighted in dark blue), 'Import emails', and a dropdown menu for 'forwarding_user'. Below the header, there are four statistic cards: 'Incomplete' with a value of 0, 'Ready to Upload' with a value of 1, 'Uploaded Today' with a value of 0, and 'New Added Today' with a value of 1. Below these cards, there are two tabs: 'Shipment Bundles (1)' and 'Manual Upload'. Below the tabs, there's a search bar 'Search bundles...' and a date range selector 'Date 02/09/2026 - 03/11/2026'. There are also filters for 'Ready & Incom...' and 'All Category'. A 'Select all (1)' button and an 'Upload' button are also present. Below these filters, there's a bundle card for 'test part off' with a status of 'Ready' and '4 docs'. It shows the email 'From: sinai.chew@tongnam.com.my' and a button 'Upload PDF'. Below the bundle card, there's a section for 'Required Documents' with 'View Files (2)'. It shows three document types: 'Invoice' with '1 file uploaded' and an 'Add More (1)' button, 'Packing List' with an 'Upload' button, and 'LMW/Exemption/MIDA' with '1 file uploaded' and an 'Add More (1)' button. At the bottom of the dashboard, there's a caption 'Main dashboard after login'.

3. Importing Emails

What it does: Fetches emails from the configured mailbox (e.g. Outlook), downloads attachments, and creates one **shipment bundle per email**. Only emails from senders in the **Sender Allowlist** are processed.

- **Step 1:** Send a set of CIPL with its custom form(s) to cipl.forward@tiongnam.com.my (one email one set)
- **Step 2:** Click the **Import** button on the dashboard.
- **Step 3:** The system connects to the mailbox, finds allowed senders' emails, and downloads attachments (ZIP, PDF, XLS, XLSX, CSV, etc.). ZIP files can be auto-extracted.
- Then go to the **Shipment Bundles** tab to review and or reclassify documents.

4. Allowlist & Team

What it does: The **Allowlist & Team** button opens a dialog where you manage **allowed sender email addresses**. Only these senders' emails are processed when you click Import. Admins can also manage **team members** and their roles in the same dialog.

- **Sender Allowlist:** Add, edit, or remove email addresses. Only attachments from these addresses are downloaded.
- **Team members:** List of users in your team. Roles: **Admin** or **Member**. Only admins can add/remove/edit members and manage allowlist.
- Switch between "Download Emails" (allowlist) and "Team members" using the tabs inside the dialog.

5. Shipment Bundles Tab

This tab lists all **shipment bundles**. Each bundle can contain: **Invoice**, **Packing List**, **LMW/Exemption** documents, and **Customs Form**.

- **Filter bar:** Search by text, filter by **Date** (from-to), **Status** (Ready & Incomplete, All, Ready, Incomplete, Uploaded, Failed), **Category** (All, Normal, Exemption, LMW).
- **Expand a bundle:** Click to see Required Documents (Invoice, Packing List, LMW) and Customs Form & Extracted Data. You can classify with AI, change document types, preview PDFs, and upload to MyCEIDS when status is **Ready**.
- **Classify with AI:** Runs Gemini AI to set document type (invoice, packing-list, lmw, etc.) and extract customs form data. Use per bundle or for unclassified documents.
- **Document types:** You can drag or assign files to Invoice, Packing List, LMW, or attach a Customs Form to the bundle.

Expanded bundle – documents and actions

The screenshot shows the 'Shipment Bundles' interface. At the top, there's a 'Manual Upload' tab. Below it, a search bar and filters for date (02/09/2026 to 03/11/2026) and status (Ready & Incom...). A 'Select all (1)' checkbox and an 'Upload' button are on the right. The main bundle 'test part off' is marked as 'Ready' and has '4 docs'. A 'Classify' button is circled in red. Below the bundle name, there's a 'Customs Form & Extracted Data' section with fields for 'J25-2-02067424/26', 'J25-2-02067432/26', 'Category' (set to 'Exemption'), 'Lorry Plate' (JTB1613), and 'Exemption No' (CDE2/2023/01426,00331,00550,00673). A 'Save' button is at the bottom right of this section. The 'Required Documents' section shows three categories: 'Invoice' (1 file uploaded), 'Packing List' (1 file uploaded), and 'LMW/Exemption/MIDA' (1 file uploaded). Each category has an 'Add More (1)' button and a list of documents with their names and sizes.

6. Uploading to MyCEIDS

To send shipment data to the **MyCEIDS** customs system:

- **First time:** Click **MyCEIDS setup** and enter MyCEIDS credentials (username, password, tenant code). Save.
- **Select bundles:** In Shipment Bundles tab, tick the checkbox for each **Ready** bundle you want to upload. You can "Select all" for ready bundles.
- **Upload:** Click the green **Upload** button. Confirm in the dialog. The system sends bundle data (invoice, packing list, LMW, customs form) to MyCEIDS.
- **Result:** On success, bundle status becomes **Uploaded**. On failure, status becomes **Failed**; fix issues (e.g. missing documents, credentials) and retry.

7. Manual Upload Tab

Use this tab to create a bundle and upload files **without email**.

- **Create bundle:** Click **Create bundle**. Enter a name if prompted, then the new bundle is created and you are taken to the upload area.
- **Add files:** Drag and drop or click to select files (PDF, XLS, XLSX, etc.). ZIP files are uploaded and extracted on the server.
- After adding documents, go back to **Shipment Bundles** tab, find the new bundle, then use **Classify with AI** and complete required document types before uploading to MyCEIDS.

8. Document Preview & Review

Preview: Click the **eye icon** on a document to open a preview (e.g. PDF). In the review dialog you can change the **document type** (Invoice, Packing List, LMW, Other) and save.

Customs form: Customs form PDFs can be previewed separately. Extracted data (form number, category, exemption number, lorry plate, etc.) is shown in the Customs Form & Extracted Data section of the bundle.
